APPLICATIONS BUILT

Buzzy
- A website that lets the user put in a cocktail ingredient and displays the cocktails that one can make using the ingredient typed in. The user can also choose how many cocktails are displayed using pre-selected options.
- Lead developer in a team of three
- Built using HTML, CSS, Bootstrap, Javascript, JQuery, Firebase, APIs, AJAX, Firebase, & Parsley
- https://github.com/StuKushner/Project-1

Crystal Collector
- A game where the user is given a random number at the start, and then the user has to click one of four crystals, all with different values. Each crystal will add that value to your score. If the total score is equal to the chosen number, the player wins. Otherwise, he or she loses and the game is reset.
- Sole developer
- Built using HTML, CSS, Javascript, & JQuery
- https://github.com/StuKushner/week-4-game

GifTastic
- A website where the user can put in the name of a TV show or movie to create a button. Upon clicking the button, the HTML becomes populated with GIFs relating to the TV show or movie put in.
- Sole developer
- Built using HTML, CSS, Javascript, JQuery, AJAX, & the GIPHY API
- https://github.com/StuKushner/week-6-hw

RELEVANT EXPERIENCE

Jet.com   Feb 2017 – Mar 2017
